

SIFTIT

The Problem - Part 1

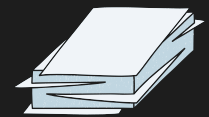

The Problem - Part 1

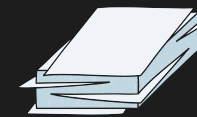

99% use email on a regular basis

69% overwhelmed
38% stressed

60% lawyers receive 50+ emails/day
16% receive 100+ emails/day

320 billion emails / day
17% increase by 2025

41% spend 2+ hours / day on emails

Lower Productivity, Job Satisfaction and
worse Mental Health

The Problem - Part 2

Solution:

Assistant

Outlook Plug-In

Easy-to-use, integration into your existing software to intelligently detect matters and classify topics

Compliant with GDPR, DPA and more

Because we never get access to your data

Benefit from Globally Improving Intelligence

Our model improves across all customers - **without you sharing your data**

SIFTIT

Product Features

...by popular demand

Detect Data Erasure Requests, and alert user

Quantify **urgency** of an email, for easier filtering

Customizable Categorization Labels

Roadmap: Highlight **relevant section** in the email

Global Self-Improving AI

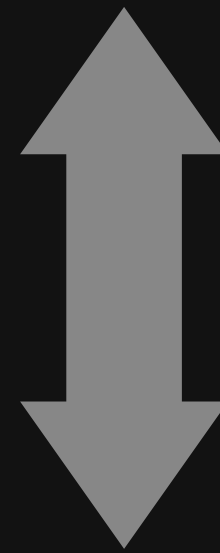

We never see your emails!

Why Now?

Businesses are looking for more ways to integrate AI NOW

The current rise of models like ChatGPT and other AI tools raised awareness of potential

More Stringent Regulations

The regulations are slowly catching up with technology, making it harder for companies to exchange data. Heavy fines!

More Exposure and Cyber Attacks

Not just companies, but also hackers understand the value of data, which is why there has been a significant increase in attacks.

Proof of Concept
